\*\* FoCo Technique™ is an original contemporary dance technique developed by Yin Yue inspired by traditional Chinese dance, folk forms, ballet and contemporary movement. The technique uses 3 progressive and interconnected training segments: Activating, Rooting and Mapping to guide dancers to experience the active integration of traditional and contemporary movement and explore the mind and body connection. The class will be divided into two parts: technique and choreography. The technique portion of the class will be conducted in follow-along fashion to go through the 3 segments without break, and the rest of the class will focus on choreography. \*\*\*
